

Arysta Life Science - S/4 Implementation and global roll out / Merger Activity

A major player in the global agriculture domain, Arysta specializes in chemicals for crop protection and life science brands. With a highly diversified IT landscape (different ERP for most regions), Arysta embarked on a global S/4 rollout program covering all its operations and processes. This was a business decision that was taken by the leadership but given the decentralized business operations and unstructured data sources this was a major undertaking including the OCM aspect. Echelon team was onboarded to draw up the plan and to create a global template using standard functionalities as much as possible to help Arysta in its digital journey

Scope

- Implementing S/4 across global Arysta locations
- Project Management
- Organizational Change Management
- Order to Cash (OTC)
- Procure to Pay (P2P)
- Record to Report (RTR)
- Forecast to Produce (FTP)
- Extended Warehouse Management (EWM)
- Inventory Management (IM)
- Master Data Governance (MDG)
- Analytics

Outcome

Echelon delivered the global template in record time encompassing all the processes. As part of the plan, pilot site went live with S/4 without any major problems. Before the template and the related localizations could be rolled out to other countries, Arysta was acquired by UPL to form a common business entity. As UPL was running its business on ECC, it was decided to delay the S/4 rollout and migrate the Arysta business over to ECC. It was here that the highly detailed documentation (processes, data source, data structures) that was delivered by Echelon came handy for the ECC migration. Using the documentation, Echelon team participated, jointly with UPL team, in the Arysta global business migration to ECC.

Why Choose Us?

Echelon is one of the three original SAP HEC Global Partners and continues to be one of less than ten global HEC-AMS partners. Our leadership has been working with the HEC organization since its inception and has jointly worked in a multitude of global SAP deployments. Echelon's cloud-first approach and extensive experience with S/4HANA allows our customers to benefit from our lean and repeatable implementation approach.

Echelon was first to the market in SAP S/4HANA with successful implementations in Heavy Equipment Manufacturing, OEM, and Wholesale Distribution. We provide:

- Greenfield implementations
- Technical upgrades (migration or Brownfield implementation) from Legacy SAP environments to S/4HANA Cloud environment
- Two-tier ERP strategies

Contact us to start your digital transformation journey. Our experts can help develop the business case and a roadmap to start your cloud journey.
